

ZAID SALMAN

GENERATIVE AI | AGENTIC AI | AI PLATFORM ENGINEER

Bengaluru, India | +91-8088061631 | zaid.cloudsre@gmail.com | LinkedIn | GitHub

Open to relocation across Europe, UAE, Saudi Arabia, and the wider Middle East

PROFESSIONAL SUMMARY

AI Platform Engineer with 3+ years of cloud and DevOps experience and hands-on delivery of production-oriented RAG and agentic AI systems. Builds LangChain/LangGraph workflows, FastAPI microservices, context and evaluation harnesses, human-in-the-loop agent loops, Langfuse observability, and secure AKS deployments for enterprise EU and MENA use cases.

CORE SKILLS

Generative AI & Agentic Systems: LLMs, RAG, LangChain, LangGraph, Multi-Agent Workflows, Prompt Engineering, Tool Calling, Structured Outputs, Embeddings, Grounding, Human-in-the-Loop, Guardrails

Context, Harness & Loop Engineering: Context Assembly, Retrieval Grounding, State Management, Schema Validation, Evals, RAGAS, Langfuse Tracing, Failure Recovery, Feedback Loops, Token/Latency/Cost Monitoring

AI Backend & Retrieval: Python, FastAPI, Pydantic, Qdrant, Hybrid Search, Reranking, PostgreSQL, Redis, Azure OpenAI, Azure AI Foundry Integration, REST APIs, Microservices

AI Platform, Cloud & Governance: Azure, AWS, AKS, Kubernetes, Docker, Helm, Argo CD, Terraform, GitHub Actions, CI/CD, Prometheus, Grafana, Key Vault, Managed Identities, JWT/RBAC, GDPR, PDPL, PII Redaction

PROFESSIONAL EXPERIENCE

DevOps Engineer | Synopsys Pvt Ltd (Client) — OPT IT Technologies (Payroll) | Bengaluru, India 10/2024–Present

- Designed secure AWS and Azure environments with Terraform, sustaining 99.9% uptime while reducing infrastructure setup time by 30%.
- Operated Kubernetes clusters and 15+ containerized microservices, reducing cloud costs by 20% and establishing scalable foundations for AI API workloads.
- Engineered CI/CD deployment harnesses with automated quality gates, container promotion, health validation, and rollback controls, cutting release time by 20%.
- Applied production platform patterns to independent GenAI systems, deploying FastAPI, LangGraph, and RAG services on AKS with Helm, Argo CD, Terraform, and GitHub Actions.

Trainee DevOps Engineer | Yara Digital Farming Pvt Ltd | Bengaluru, India 01/2023–09/2024

- Built GitHub Actions, Azure Pipelines, and Argo CD workflows for Python and container services, improving release velocity by 20%.
- Integrated AKS with Key Vault and Managed Identities, creating passwordless security patterns applicable to LLM endpoints and AI microservices.
- Automated Azure provisioning with Python and the Azure SDK, enabling repeatable cloud environments for data and AI application delivery.
- Managed 100+ Windows/Linux servers with Ansible and implemented autoscaling Jenkins workers on Azure VM Scale Sets.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering in Electronics & Communication | SJCE College, Mysore | 2023 | CGPA: 8.53/10

Certifications: AWS Certified Solutions Architect – Associate (2024) | Microsoft Certified: Azure Administrator Associate (AZ-104) | Microsoft Certified: DevOps Engineer Expert (AZ-400)

GENERATIVE AI PROJECTS

Enterprise Multilingual RAG & AI Platform 2026

Python | FastAPI | LangChain | LangGraph | Azure OpenAI | Qdrant | PostgreSQL | Redis | MinIO | Langfuse | RAGAS | Docker | Kubernetes | Helm | Argo CD | Terraform

- Architected a 12-service FastAPI RAG platform in 16 containers spanning OCR ingestion, chunking, embeddings, Qdrant retrieval, Azure OpenAI generation, citations, and feedback.
- Engineered the context layer with locale-aware chunking, metadata filters, multilingual retrieval, and 70% dense / 30% keyword search across English, Arabic, French, and German.
- Built a LangGraph loop and LLM harness with routing, structured context, fallbacks, schema checks, Langfuse/RAGAS evaluation, grounded citations, and failure tracing.
- Productionized the platform with Kubernetes, Helm, Argo CD, Terraform, Prometheus/Grafana, and scheduled SharePoint/Confluence synchronization with deletion propagation.

Agentic Cloud Reliability & FinOps Platform (ACRFP) 2026

Python | FastAPI | LangChain | LangGraph | Pydantic | Azure | AKS | Terraform | Docker | Kubernetes | Helm | Argo CD | GitHub Actions

- Built a LangGraph agent loop with 3 specialists, 6 state-machine nodes, context-rich incident state, and 12 typed remediation tools for reliability and FinOps workflows.
- Engineered a safety harness with deterministic policy-as-code, structured outputs, sovereign-region controls, CRITICAL deny-by-default, HITL gates, and dual approval for HIGH-risk actions.
- Delivered 3 FastAPI services and 15 endpoints with audit tracing, dry-run execution, Terraform-provisioned AKS, Helm/Argo CD assets, and 11 CI tests.
- Implemented an approval console, webhook notifications, JSON/CSV audit exports, and a dry-run execution boundary preventing agents from directly invoking kubectl or Azure ARM.
