

ZAID SALMAN

GENERATIVE AI | AGENTIC AI | AI PLATFORM ENGINEER

Bengaluru, India | +91-8088061631 | zaid.cloudsre@gmail.com | LinkedIn | GitHub
Open to relocation across Europe, UAE, Saudi Arabia, and the wider Middle East

PROFESSIONAL SUMMARY

DevOps and AI Platform Engineer with 3+ years of experience across Azure, AWS, Kubernetes, Terraform, and CI/CD, plus hands-on delivery of production-oriented RAG and agentic AI systems. Built LangChain/LangGraph workflows, FastAPI microservices, hybrid retrieval, Langfuse observability, human-in-the-loop guardrails, and AKS deployments for EU and MENA use cases.

CORE SKILLS

Generative AI & Agentic AI: LLMs, RAG, Agentic Workflows, LangChain, LangGraph, Prompt Engineering, Tool Calling, Structured Outputs, Embeddings, Grounding, Context Engineering, Human-in-the-Loop, Guardrails

Retrieval & LLMops: Qdrant, Vector Search, Semantic Search, Hybrid Search, Reranking, Chunking, Langfuse, RAGAS, RAG Evaluation, Prompt Tracing, Token/Latency/Cost Monitoring

Backend, Cloud & Platform: Python, FastAPI, REST APIs, Pydantic, PostgreSQL, Redis, Azure OpenAI, Azure AI Foundry integration, AWS, AKS, Docker, Kubernetes, Helm, Argo CD, Terraform, Ansible

DevSecOps, LLMops & Governance: GitHub Actions, Azure Pipelines, Jenkins, CI/CD, Prometheus, Grafana, JWT, RBAC, OAuth, Azure Key Vault, Managed Identities, GDPR, PDPL, PII Redaction, Audit Logging

PROFESSIONAL EXPERIENCE

DevOps Engineer | Synopsys Pvt Ltd (Client) — OPT IT Technologies (Payroll) | Bengaluru, India **10/2024–Present**

- Designed secure AWS and Azure environments with Terraform, sustaining 99.9% uptime while reducing infrastructure setup time by 30%.
- Operated Kubernetes clusters and containerized 15+ microservices, contributing to a 20% reduction in cloud costs.
- Optimized CI/CD pipelines and deployment workflows, cutting build and release time by 20%.
- Applied production DevOps patterns to independent GenAI platforms, containerizing FastAPI/LangGraph services and deploying AI workloads to AKS with Helm, Argo CD, Terraform, and GitHub Actions.

Trainee DevOps Engineer | Yara Digital Farming Pvt Ltd | Bengaluru, India **01/2023–09/2024**

- Built CI/CD pipelines with GitHub Actions, Azure Pipelines, and Argo CD, improving release velocity by 20%.
- Integrated AKS with Azure Key Vault and Managed Identities to enable passwordless workload authentication and safer secret access.
- Automated Azure resource provisioning with Python and the Azure SDK, reducing repetitive infrastructure operations.
- Managed 100+ Windows/Linux servers with Ansible and implemented autoscaling Jenkins workers on Azure VM Scale Sets.

GENERATIVE AI PROJECTS

Enterprise Multilingual RAG & AI Platform 2026

Python | FastAPI | LangChain | LangGraph | Azure OpenAI | Qdrant | PostgreSQL | Redis | MinIO | Langfuse | RAGAS | Docker | Kubernetes | Helm | Argo CD | Terraform

- Architected a 12-service FastAPI RAG platform in a 16-container environment covering multi-format OCR ingestion, chunking, embeddings, Qdrant retrieval, Azure OpenAI generation, citations, and feedback.
- Built a stateful LangChain/LangGraph workflow and configurable hybrid retrieval (70% dense / 30% keyword), retrieving approximately three grounded chunks at an observed relevance score of approximately 0.72.
- Enabled English, Arabic, French, and German search with locale-aware processing, metadata filters, and cross-language negative tests.
- Instrumented RAG with Langfuse and RAGAS and implemented JWT/RBAC, GDPR erasure, PDPL region tagging, PII redaction, Prometheus/Grafana, and Kubernetes delivery.

Agentic Cloud Reliability & FinOps Platform (ACRFP) 2026

Python | FastAPI | LangChain | LangGraph | Pydantic | Azure | AKS | Terraform | Docker | Kubernetes | Helm | Argo CD | GitHub Actions

- Built a LangGraph reliability and FinOps platform with 3 specialist agents, a 6-node state machine, and 12 typed remediation actions for diagnosis, cost analysis, and structured remediation.
- Implemented deterministic policy-as-code guardrails with allow/approval/deny decisions, sovereign-region controls, CRITICAL deny-by-default, and dual approval by two distinct reviewers for HIGH-risk actions.
- Delivered 3 FastAPI services and 15 endpoints with approval UI, webhook notifications, audit export, dry-run execution, Terraform-provisioned AKS, Helm/Argo CD assets, and 11 CI tests.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering in Electronics & Communication | SJCE College, Mysore | 2023 | CGPA: 8.53/10

Certifications: AWS Certified Solutions Architect – Associate (2024) | Microsoft Certified: Azure Administrator Associate (AZ-104) | Microsoft Certified: DevOps Engineer Expert (AZ-400)
