

ZAID SALMAN

GENERATIVE AI | AGENTIC AI | AI PLATFORM ENGINEER

Bengaluru, India | +91-8088061631 | zaid.cloudsre@gmail.com | LinkedIn | GitHub
Open to relocation across Europe, UAE, Saudi Arabia, and the wider Middle East

PROFESSIONAL SUMMARY

DevOps and AI Platform Engineer with 3+ years of experience building reliable cloud platforms across Azure and AWS and hands-on delivery of production-oriented Generative AI, RAG, and agentic systems. Built LangChain/LangGraph workflows, FastAPI microservices, hybrid retrieval, LLMOps observability, human-in-the-loop guardrails, and cloud-native deployments using AKS, Kubernetes, Docker, Helm, Argo CD, and Terraform. Combines AI engineering with platform reliability, security, CI/CD, and infrastructure automation for regulated EU and MENA environments.

CORE SKILLS

Generative AI & Agentic AI: LLMs, RAG, Agentic Workflows, LangChain, LangGraph, Prompt Engineering, Tool Calling, Structured Outputs, Embeddings, Grounding, Context Engineering, Human-in-the-Loop, Guardrails

Retrieval & LLMOps: Qdrant, Vector Search, Semantic Search, Hybrid Search, Reranking, Chunking, Langfuse, RAGAS, RAG Evaluation, Prompt Tracing, Token/Latency/Cost Monitoring

Programming & APIs: Python, FastAPI, REST APIs, Async APIs, Pydantic, SQL, PostgreSQL, Redis, Microservices

Cloud & Platform: Azure OpenAI, Azure AI Foundry integration, Azure AI Services, AWS, AKS, Docker, Kubernetes, Helm, Argo CD, Terraform, Ansible, GitHub Actions, Azure Pipelines, Jenkins, CI/CD

Observability & Security: Prometheus, Grafana, Audit Logging, JWT, RBAC, OAuth, Azure Key Vault, Managed Identities, GDPR, PDPL, PII Redaction, Data Residency, Secrets Management

PROFESSIONAL EXPERIENCE

DevOps Engineer | Synopsys Pvt Ltd (Client) — OPT IT Technologies (Payroll) | Bengaluru, India **10/2024–Present**

- Designed secure AWS and Azure environments with Terraform, sustaining 99.9% uptime while reducing infrastructure setup time by 30%.
- Operated Kubernetes clusters and containerized 15+ microservices, contributing to a 20% reduction in cloud costs.
- Optimized CI/CD pipelines and deployment workflows, cutting build and release time by 20%.
- Resolved critical production incidents and AWS VPC peering failures, restoring service connectivity and platform stability.

Trainee DevOps Engineer | Yara Digital Farming Pvt Ltd | Bengaluru, India **01/2023–09/2024**

- Built CI/CD pipelines with GitHub Actions, Azure Pipelines, and Argo CD, improving release velocity by 20%.
- Integrated AKS with Azure Key Vault and Managed Identities to enable passwordless workload authentication and safer secret access.
- Automated Azure resource provisioning with Python and the Azure SDK, reducing repetitive infrastructure operations.
- Managed 100+ Windows and Linux servers through Ansible and implemented autoscaling Jenkins workers on Azure VM Scale Sets.

SELECTED GENERATIVE AI PROJECTS

Enterprise Multilingual RAG & AI Platform 2026

Python | FastAPI | LangChain | LangGraph | Azure OpenAI | Qdrant | PostgreSQL | Redis | MinIO | Langfuse | RAGAS | Docker | Kubernetes | Helm | Argo CD | Terraform

- Architected an enterprise RAG platform as 12 independently deployable FastAPI microservices in a 16-container environment, isolating authentication, ingestion, OCR, chunking, embeddings, retrieval, generation, citations, metadata, and feedback.
- Engineered multi-format document ingestion for PDF, Word, Excel, PowerPoint, and text, automating OCR, locale-aware chunking, embeddings, Qdrant indexing, object storage, and PostgreSQL metadata persistence.
- Built a stateful LangGraph workflow in the LangChain ecosystem for query routing, retrieval, context assembly, Azure OpenAI generation, fallbacks, and source-attributed responses.
- Implemented configurable hybrid retrieval (70% dense semantic similarity / 30% keyword relevance), retrieving approximately three grounded chunks with an observed relevance score of approximately 0.72.
- Enabled multilingual search across English, Arabic, French, and German with locale-aware processing, Arabic sentence boundaries, language filters, and cross-language negative tests.
- Instrumented retrieval and generation with Langfuse and RAGAS; added JWT/RBAC, document permissions, GDPR erasure, PDPL region tagging, PII redaction, audit logs, Prometheus/Grafana, and repeatable Kubernetes deployments.

Agentic Cloud Reliability & FinOps Platform (ACRFP) 2026

Python | FastAPI | LangChain | LangGraph | Pydantic | Azure | AKS | Terraform | Docker | Kubernetes | Helm | Argo CD | GitHub Actions

- Built a LangGraph reliability and FinOps platform with 3 specialist agents, a 6-node state machine, and 12 typed remediation actions for diagnosis, cost analysis, and structured remediation.
- Implemented deterministic policy-as-code guardrails with allow/approval/deny decisions, sovereign-region controls, CRITICAL deny-by-default, and dual approval by two distinct reviewers for HIGH-risk actions.
- Delivered 3 FastAPI services exposing 15 endpoints, a human approval UI, webhook notifications, JSON/CSV audit export, and a safe dry-run executor that prevents agents from directly invoking kubectl or ARM.
- Provisioned a 1-node AKS environment with Terraform and packaged Helm, nginx Ingress/TLS, cert-manager, and Argo CD assets; added 11 automated tests and GitHub Actions CI.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering in Electronics & Communication | SJCE College, Mysore | 2023 | CGPA: 8.53/10

- AWS Certified Solutions Architect – Associate (2024)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: DevOps Engineer Expert (AZ-400)
